## ECONOMIC PROFILE<sup>†</sup>, 1966

### EUROPEAN NATO

LAND MASS: 2,877,000  
square kilometers  
INHABITANTS: 295.5 million  
GNP: US \$ 510 billion

### CANADA

LAND MASS: 9,976,000  
square kilometers  
INHABITANTS: 20.0 million  
GNP: US \$ 55 billion

### US

LAND MASS: 9,363,000  
square kilometers  
INHABITANTS: 196.8 million  
GNP: US \$ 718 billion

### CUBA<sup>†</sup>

LAND MASS: 115,000  
square kilometers  
INHABITANTS: 7.4 million  
GDP: US \$ 2.9 billion  
(1957 prices)

<sup>†</sup>NOTE: The data for gross national product (GNP) are for 1966 (in 1965 prices) converted to US purchasing power equivalents, except for India, Cuba, North Vietnam, and North Korea. Data for India (in 1965 prices) and Cuba (in 1957 prices) are gross domestic product (GDP) for 1966 converted to US dollars using prevailing exchange rates. Data for Cuba are given in 1957 prices to minimize the inflationary effects during the last several years. Data for GNP for North Vietnam are for 1964 and for North Korea; 1965. All data on inhabitants are for midyear 1966 and data on land mass are for the latest year available.

**EASTERN EUROPEAN  
COMMUNIST COUNTRIES**

LAND MASS: 989,000  
square kilometers  
INHABITANTS: 100.6 million  
GNP: US \$ 118 billion

**USSR**

LAND MASS: 22,272,000  
square kilometers  
INHABITANTS: 233.2 million  
GNP: US \$ 336 billion

**NORTH KOREA<sup>†</sup>**

LAND MASS: 122,000  
square kilometers  
INHABITANTS: 12.6 million  
GNP: US \$ 2.7 billion

**JAPAN**

LAND MASS: 370,000  
square kilometers  
INHABITANTS: 98.9 million  
GNP: US \$ 124 billion

**NORTH VIETNAM<sup>†</sup>**

LAND MASS: 159,000  
square kilometers  
INHABITANTS: 18.1 million  
GNP: US \$ 1.6 billion

**COMMUNIST CHINA**

LAND MASS: 9,561,000  
square kilometers  
INHABITANTS: 772 million  
GNP: US \$ 78 billion

**INDIA<sup>†</sup>**

LAND MASS: 3,289,000  
square kilometers  
INHABITANTS: 499 million  
GDP: US \$ 50 billion

## FOREWORD

### 1. Purpose and Scope

The *Economic Intelligence Statistical Handbook, 1967* provides statistics on the economies of the Communist countries and the countries of the North Atlantic Treaty Organization (NATO)—including France. The content and format have been revised to make possible more explicit comparisons and new tables and graphics have been added.

In general, the data in the *Handbook* are for 1955 and 1960-66. A summary table is presented for European NATO, Eastern Europe, each of the Communist countries, selected NATO countries, India,  The data for Mongolia, because of their scarcity, are presented in a summary table but are not included in the individual commodity or aggregative tables. The graphics and tabular graphics are designed for use as visual aids. Footnotes have been used liberally to give definitions, exceptions, and methodology. Footnotes to the commodity tables give more detailed definitions of the data than those appearing for the commodities on the summary table for each country. Therefore, the footnotes to the commodity tables should be referred to when a complete description of the data shown is required.

### 2. Rounding of the Totals

In each table the data for the individual countries have been rounded consistently. Because of the limitations in the cumulative data, the totals have been rounded, with some exceptions, to three significant digits. In general, zeros appearing after the last nonzero number following the decimal point are not significant but are used merely for consistency in presentation.

Totals are not presented if missing data are believed to represent a significant part of the total. In general, data are not given for countries for which a significant amount of data is not available. Because of rounding, components may not add to the totals shown.

### 3. Symbols

The abbreviation N.A. (not available) is used when information about the existence of the data or the magnitude of the data is not available, and the abbreviation Negl. (negligible) is used when the magnitude of the data is less than half of the final unit employed for each table. The metric system is used throughout.

### 4. Classification of Data

The overall classification of the *Handbook* is SECRET/NO FOREIGN DISSEM. The unclassified data, indicated by an asterisk (\*), may be official data of the country cited or may be unclassified estimates of this Office. Tables in which all of the data are unclassified have been identified accordingly. *Classified data, however, frequently occur on the reverse of the page, and, therefore, caution should be exercised if pages are removed from this publication.*

### 5. Sources

The data given for the most recent years are frequently preliminary and subject to revision. The data for the Communist countries are estimates of this Office, official data from the country cited, or estimates made by other organizations. The data for the NATO and other Free World countries are from publications of the United Nations and the Organization for Economic Cooperation and Development (OECD), are from unclassified publications of other international organizations or individual countries of the Free World, or are estimates of this Office.

### 6. Terms

Unless otherwise indicated, the term *Communist Countries* includes the USSR, the countries of Eastern Europe, Communist China, North Korea, North Vietnam, Albania, Cuba, and Yugoslavia; the term *Eastern Europe* includes Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Ru-

mania. The term *NATO* includes the United States, Belgium, Canada, Denmark, France, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Turkey, the United Kingdom, and West Germany. The term *developed countries* includes Austria, Belgium, Denmark, Finland, France, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Norway, the Netherlands, Sweden, Switzerland, the United Kingdom, West Germany, Australia, Canada, Japan, New Zealand, South Africa, and the United States. The term *less developed countries of the Free World* includes (1) all countries of Africa except the Republic of South Africa and the United Arab Republic; (2) all countries in South and

Southeast Asia, including Afghanistan; (3) Portugal and Spain; (4) all countries in Latin America except Cuba; and (5) all countries in the Middle East including—in addition to those normally designated—Cyprus, Greece, Turkey, and the United Arab Republic.

As far as possible, production data for the Saar<sup>25X6</sup> have been included in the data [redacted] for all years, unless otherwise indicated. Data for Alaska and Hawaii, when available, have been included in the total for the US. Data for any of the above country groupings may or may not include all of the countries listed above, depending on the commodity or services listed.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> For the individual European NATO countries, the ratios for converting gross national product (GNP) in national currencies at 1965 prices into 1965 US dollars on the basis of US purchasing power equivalents are derived from the 1950 ratios in Milton Gilbert and Associates, *Comparative National Products and Price Levels*, OEEC, Paris, 1958, using the geometric mean of European and US weighted ratios. These 1950 ratios were moved to 1965 by applying the following factor: the derived price indexes for each European country for 1950-65 divided by a derived price index for the US for 1950-65. These price indexes were derived for each country by dividing the growth of GNP in current prices by the growth of GNP in constant prices. The ratios thus obtained were applied to the GNP values, given in the national currencies in 1965 prices. The total GNP for the European NATO countries is based on the estimate that the total GNP of the individual countries shown represents 95 percent of the total European NATO GNP, which is the approximate relationship derived from other sources. The values shown for the Communist countries have been calculated in a manner which makes them reasonably comparable with the values shown for the NATO countries.

<sup>b</sup> The base years are 1955 and 1961, respectively. Rates of growth are derived from unrounded data.

<sup>c</sup> Including data for West Berlin. The data for West Germany for 1960, excluding the Saar and West Berlin, is US \$93.9 billion in 1965 purchasing power equivalents.

<sup>d</sup> Rate of growth for 1956-65.

<sup>e</sup> Rate of growth for 1962-65.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> US market prices. Total Soviet gross national product (GNP) and the various end uses were converted to dollars not by the official rate of exchange but by the average purchasing power ratio of the dollar and the ruble calculated from actual or estimated prices paid for various goods and services in the two economies. For GNP as a whole and for each end use component of GNP, these average ratios (ruble-dollar ratios) were estimated by weighting individual price ratios by both US and Soviet expenditure weights. The geometric mean of the US weighted and Soviet weighted ratios was then used for the conversion of Soviet values into dollars.

The magnitudes for the Soviet end use components were calculated to measure quantity of output compared with the US but not the cost in resources. The share of total economic resources devoted to a particular end use or the share of total output originating in an individual sector (for example, agriculture or industry) in the USSR should be measured in internal ruble prices and costs. Agriculture, for example, alone uses 40 percent of the civilian labor force, or 49 million people, as a result of the inefficiency of that sector in the USSR.

The adjusted end uses of GNP are defined as follows:

(1) Consumption comprises personal expenditures for goods and services for all purposes and noninvestment outlays by government for goods and services for health and education. (The personal consumption expenditures for the US are \$431.5 billion.)

(2) Investment is defined (a) for both the US and the USSR as the sum of expenditures for gross private domestic investment; for public construction other than that for defense facilities; for equipment purchased by the government except that for defense; and for defense stockpiling and defense-production expansion; and (b) for the US, as also including expenditures by state and local government for development of atomic energy. (The gross private domestic investment for the US is \$106.6 billion.)

(3) Defense as a component of GNP comprises government purchases of goods and services for the military services, federal government expenditures on atomic energy development, and outlays on space research and technology. Defense excludes stockpiling activities and net military grants for foreign military assistance. (The federal government purchases of goods and services for national defense, excluding purchases by NASA, for the US are \$50.1 billion.)

(4) Administration as a component of GNP is the residual left after all current expenditures for national defense, health, and education and all capital expenditures are subtracted from government purchases of goods and services. (There is no equivalent category for the unadjusted data for the US.)

(5) Net exports and foreign military assistance are shown only for the US. The equivalent category for the USSR cannot be precisely measured but is thought to be included in the value of aggregate GNP.

<sup>b</sup> Based on unrounded data.

° The sum of the end use components of Soviet GNP, valued in dollars, does not equal the dollar value of aggregate GNP, because of the use of average ruble-dollar ratios in converting from ruble values to dollar values. Nevertheless, the individual end use components were not adjusted to agree with the total, since the US-USSR comparisons shown are believed to give the best available description of relative size.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> The individual series for gross national product (GNP) for the various countries are acceptable when the data are not to be used for international comparisons. The series are inadequate for international comparisons because they are based on the conversion of GNP into a single currency using rates of exchange at par value. Such international comparisons are of doubtful value because the rates do not adequately indicate relative purchasing power. The more correct data for the majority of the countries for comparison of GNP is to be found in Table 2, p. 2.

<sup>b</sup> The base years are 1955 and 1961, respectively. Rates of growth are derived from unrounded data.

° Including data for West Berlin.

<sup>a</sup> Because of the well-known difficulties in using Soviet prices as a measure of resource burden, the shares of GNP in this table are based on GNP at factor cost. In calculating GNP at factor cost, 1955 end use weights have been revised from a market price basis to a factor cost basis by subtracting turnover taxes and adding amortization charges, implicit interest costs, agricultural land rent, and subsidies. These revised weights are then moved over time by indexes of the value of the various end uses in constant market prices.

<sup>b</sup> Including inventories, civilian research and development, and expenditures on capital repair.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Indexes for the NATO countries are value-added weighted indexes of intermediate and final products of industry. Industry includes manufacturing and mining and, in most countries, public utilities. Data for Belgium, France, Italy, Luxembourg, the Netherlands, the UK, and West Germany exclude the manufacture of food, beverages, and tobacco. The indexes for the Communist countries are estimates of this Office—constructed as nearly as possible on the same basis as the indexes for Western countries—or other calculations accepted by this Office. The indexes for the Communist countries include manufacturing, mining, and public utilities.

<sup>b</sup> The base years are 1955 and 1961, respectively. Rates of growth are derived from unrounded data.

<sup>c</sup> Index of gross values for individual commodities and branches aggregated by 1960 value-added weights. The three sectors covered—materials, machinery, and nondurable consumer goods—constitute 50.2 percent, 30.4 percent, and 19.4 percent, respectively, of the value-added weights for industrial production. This index is as comparable as data will permit with the index of US industrial production of the US Federal Reserve Board.

<sup>d</sup> Estimates of this Office computed by applying value-added weights to data for commodity production. The data are fragmentary and uncertain; therefore the index should be regarded as providing only a tentative indication of the general level and trend in production.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> These indexes are measures of the "gross" value of production of industry at constant prices. The gross value of production is, in general, the sum of the value of output of all industrial enterprises. The definition of industry in Communist countries includes not only manufacturing, mining, and public utilities, as in most Western definitions of industry, but also certain other activities (varying from country to country).

<sup>b</sup> The base years are 1955 and 1961, respectively. Rates of growth are derived from unrounded data.

<sup>c</sup> Rate of growth for 1956-65.

<sup>d</sup> Rate of growth for 1962-65.

<sup>e</sup> Estimated.

\* An asterisk indicates that the data are unclassified.

\* Machine tractor stations in 1955, repair technical stations thereafter.

b Not comparable with previous years, as a consequence of the elimination from budgetary revenue of revenue from the savings deposits of the population.

c Estimated data.

d Including expenditures on Machine Tractor Stations.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Because of adjustments in the constant price valuation as well as a revision in definitional concept, the old official Soviet investment series cannot be extended beyond 1964. Nor can the new official series be extended backward for the years before 1964 except for two or three isolated years. The two series may be linked, however, through the common year 1964. Thus, annual growth rates for 1965 may be calculated without significant distortion by using 1964 data in the new series as the base.

<sup>b</sup> All data are expressed in investment prices of 1 July 1955 adjusted for new unit valuations introduced in 1956, for the reduction of overhead cost norms in 1958, and for the reduction of equipment installation prices in 1959. In addition, the new series reflects adjustments for the reduction in 1962 of prices for project-survey work and of unit valuations for certain types of construction-in-  
 installation work, as well as the exclusion—for reasons unexplained—of "outlays for the acquisition of equipment for existing state institutions, schools, hospitals, kindergartens, and nurseries." As a result of these differences, 1964 investment under the new series is 952 million new rubles less than under the old series, including a difference of 184 million new rubles in construction, 468 million new rubles in equipment, and 300 million new rubles in other capital outlays.

<sup>c</sup> Preliminary estimate.

<sup>d</sup> Excluding the construction industry.

Table 13

Drawings and Scheduled Repayments on Western Credits to the USSR <sup>a</sup>  
1959-66

	Estimated Drawings <sup>b</sup>	Scheduled Repayments <sup>c</sup>	Interest <sup>d</sup>	Net Credits	Outstanding at End of Year
	Million US \$				
1959.....	50	10	0	40	40
1960.....	225	55	2	168	210
1961.....	250	105	10	135	355
1962.....	300	165	18	117	490
1963.....	300	215	24	61	575
1964.....	300	255	29	16	620
1965.....	350	290	31	29	680
1966.....	355 <sup>e</sup>	280	35	40	755

<sup>a</sup> There is no record that any medium-term (five years or less) or long-term (in excess of five years) credits were extended to the USSR by Western countries before 1959.

<sup>b</sup> Range of error of plus or minus 20 percent for 1959-62 and 10 percent for 1963-66.

<sup>c</sup> Including downpayments.

<sup>d</sup> Interest computed at 5 percent on medium-term credits and at 6 percent on all long-term credits except the Fiat credit, which is computed at its announced rate of 5.75 percent.

<sup>e</sup> Including the first long-term credit drawings, amounting to an estimated US \$100 million.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> The base year is the year before the first year of the stated period and percentages for the plan data are based on the midpoint of the ranges.

<sup>b</sup> The official Soviet measure is based on a Marxist concept of national income and differs significantly from the concept used in Western market economies. For example, the Soviet measure excludes the value of services and overstates the contribution of industry by including all indirect taxes.

<sup>c</sup> Official "gross" value series.

<sup>d</sup> Including production of gas from coal and shale. Table 110, p. 113, excludes production of gas from these sources.

<sup>e</sup> Expressed in 1955 prices.

Table 19

Distribution of Defense and Space Expenditures, <sup>a</sup> by Major Mission in the US and the USSR  
1966

	US <sup>b</sup> (Fiscal Year)	USSR <sup>c</sup> (Calendar Year)	
	Billion Current US \$	Billion 1964 US \$	Billion New Rubles <sup>d</sup>
Strategic attack.....	4.6	5.4	2.4
Strategic defense.....	1.6	5.2	2.2
General purpose.....	30.2	17.0	5.7
RDTE & S.....	15.0	12.0	5.2
Other.....	22.4	14.6	3.8
Total.....	73.8	54.2	19.3

<sup>a</sup> To achieve as high a degree of comparability as possible, adjustments have been made to the basic data available for both the US and USSR. For example, the ruble data, by mission, shown here differ somewhat from the comparable 1966 data shown in Table 20, p. 20. All expenditures for research, development, test and evaluation activities associated with military programs as well as expenditures for both civilian and military space programs have been aggregated and are included under RDTE & S. All expenditures for nuclear warheads have been aggregated and are included under "Other." All expenditures for military assistance and civil defense programs have been excluded.

<sup>b</sup> Planned total obligational authority (TOA). It should be noted that the pattern of expenditures shown for the US is not representative of the pre-Viet Nam period.

<sup>c</sup> These data for the USSR are reviewed and updated several times each year. Therefore, if they are to be used for more than general background purposes, this Office should be consulted to insure that they represent the latest available information. The Soviet expenditures presented in dollars are measures of Soviet programs computed on the basis of US factor costs and do not measure program costs as seen by Soviet planners.

<sup>d</sup> Expressed in 1955 prices.

Total military expenditures.....	16.4	16.0	16.3	17.0	17.2	17.1	17.6	19.3
Of which:								
Military machinery.....	7.9	9.1	9.6	10.3	10.6	10.5	10.8	12.3

<sup>a</sup> These data are reviewed and updated several times each year. Therefore, if they are to be used for more than general background purposes, this Office should be consulted to insure that they represent the latest available information. The estimates conceptually include all outlays for personnel and other operating costs, procurement of all hardware used by the military establishment (including nuclear warheads), construction of facilities, military and nuclear research and development activities, and all space programs but exclude military assistance programs. Many of the funds required to cover these expenditures come from sources other than the budget category labeled "Defense" by the USSR. Most of the figures in the table are derived from detailed calculations of the estimated size and cost to deploy and operate individual program elements of the Soviet military establishment. The underlying calculations produce numbers that suggest a high degree of accuracy. In fact, however, these estimates are subject to considerable uncertainty and should not be considered as precise measures. Nevertheless, the estimates are as accurate and as comprehensive as the data available on 15 May 1967 permitted.

<sup>b</sup> Expressed in 1955 prices.

<sup>c</sup> Including expenditures for tactical aviation.

<sup>d</sup> Including expenditures for naval aviation.

<sup>e</sup> Expenditures for research, development, test, and evaluation for all military and nuclear energy programs as well as all expenditures for military and civilian space programs. These estimates are derived from analysis of published Soviet financial data and do not represent detailed calculations of the estimated magnitude and cost of individual programs.

<sup>f</sup> Expenditures for reserve training, militarized security forces, retirement pay, and paramilitary training, in addition to command and support for the active military establishment.

<sup>a</sup> Excluding the armed forces.

<sup>b</sup> Annual averages of monthly data. Data are for civilian employment and differ from those presented in Table 148, p. 145. Data in Table 148 are for farm employment and include farm operators doing 1 or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages. Data in Table 148 are based on a survey of farm payrolls conducted by the US Department of Agriculture. Data for the agricultural labor force are based on a household survey of the entire population conducted by the US Bureau of Census. Data in Table 148 are a more comprehensive count of agricultural employment and are considered to be more comparable to data presented for the USSR, whereas data in this table are considered to be more comparable to data presented for the Communist countries as a whole.

<sup>c</sup> Excluding militarized security forces.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Based on gross domestic product data for 1960 that was moved forward with an index of current national income to 1965 prices and deflated by a similar index for constant national income. India does not publish gross national product data, and published series for gross domestic product do not extend beyond 1960. Data are for fiscal years ending 31 March of the stated year and are converted at the par value exchange rate of 4.7619 rupees to US \$1.<sup>b</sup> Data are for the year beginning 1 April of the stated year.<sup>c</sup> Ingots only.<sup>d</sup> Including data for Goa.<sup>e</sup> Estimated from planted acreage.<sup>f</sup> Annual average for 1955-59.<sup>g</sup> Mill and decentralized sector production.<sup>h</sup> Mill production only.<sup>i</sup> Excluding production for the military.

\* An asterisk indicates that the data are unclassified.

° Annual average for 1955-59.

† Data are as of 30 June of the stated year.

a Converted at US purchasing power equivalents.

b Including the armed forces and the unemployed.

c Energy expressed in coal equivalents has a calorific value of 7,000 kilocalories per kilogram.

d Data are for barley, oats, rye, and wheat.

e Data are for beef, veal, pork, mutton, horsemeat, and edible offal.

f Salt water catch only.

g Fabrics after undergoing finishing processes.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Exports are domestic exports only, excluding reexports, and are valued f.a.s. Except for 1955, exports include data for Estonia, Latvia, and Lithuania, which are treated separately in Department of Commerce statistics.<sup>b</sup> The minor differences between the totals shown in this table and those shown on Table 54, p. 54, are due to differences in definition.<sup>c</sup> Excluding US wheat shipped from a Canadian port, as reported by US grain inspectors, of 4.1 million bushels valued at US \$7.4 million. The final destinations were unknown at the time of export from the United States.<sup>d</sup> Imports for 1955 and 1960-62 are for consumption only whereas imports for 1963-65 are general imports. Imports are valued f.o.b. port of export and, except for 1955, include data for Estonia, Latvia, and Lithuania, which are treated separately in Department of Commerce statistics.<sup>e</sup> Data may include unrefined metal.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data for 1955 and 1960-65 for exports of total petroleum, crude oil, and petroleum products and for exports to the Communist countries are official Soviet statistics. Data for the Free World are derived as residuals and include exports for which the importing country is not specified. Therefore, the values in this table will differ slightly from the sum of the data from Table 66, p. 66, and Table 68, p. 68. Cuba is included in the Free World in 1955 and in the Communist countries in 1960-66.

<sup>b</sup> Estimated. Value data are based on constant 1965 average prices.

Graphic 1

# US AND COMMUNIST ECONOMIC AID EXTENDED TO LESS DEVELOPED COUNTRIES OF THE FREE WORLD, BY RECIPIENT, 1954-66<sup>†</sup>

<sup>††</sup>Data are for extensions, not actual drawings, and include credits and grants.  
<sup>†††</sup>Credits extended after the formation of the Laos Coalition Government under the Geneva Accord of July 1961.

<sup>††</sup>Including economic and technical assistance and defense support programs under the Foreign Military Assistance Act and subsequent programs authorized in the Foreign Military Assistance Act of 1961. Funds earmarked for surplus agricultural products, authorized long-term Export-Import Bank loans, and US contributions to international organizations.

<sup>†</sup>For comparison, this graphic compares only the less developed countries to which both US aid and Communist aid were extended (all those to which Communist aid was extended but not all to which US aid was extended). US data are for 1 July 1964 to 1 July 1966. Data for Communist countries include extensions of US \$1.7 million made to Afghanistan in January 1964.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Nitrogen fertilizer (in terms of nitrogen), phosphorous fertilizer (in terms of phosphoric anhydride), and potassium fertilizer (in terms of potassium oxide).

<sup>b</sup> The years for the NATO data are "fertilizer years"—that is, in general, the year beginning 1 July of the stated year.

<sup>c</sup> Data are for 1963/64 and are included in the NATO total for 1964.

Table 99

Production of Mineral Fertilizer in the US and the USSR  
1955 and 1960-66  
(In Terms of Soviet Statistical Reporting Units <sup>a</sup>)

	Thousand Metric Tons							
	1955	1960	1961	1962	1963	1964	1965	1966
US <sup>b</sup> .....	25,851*	32,320*	35,108*	38,770*	43,835*	47,015*	53,781*	62,408*
USSR .....	9,669*	13,867*	15,322*	17,258*	19,935*	25,562*	31,253*	35,800*

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Soviet production of fertilizer is usually reported as follows: nitrogen fertilizer on the basis of fertilizer containing 20.5 percent nitrogen, potassium fertilizer on the basis of 41.6 percent potassium oxide, and most types of phosphorous fertilizer on the basis of 18.7 percent phosphoric anhydride. In addition, total production includes an insignificant quantity of microfertilizer.

<sup>b</sup> Data are based on US production given in pure nutrients and recomputed to conform to the Soviet method for expressing production. The years for US data represent "fertilizer years"—that is, the year beginning 1 July of the stated year.

Table 100

Production of Plastics in the US and the USSR <sup>a</sup>  
1955 and 1960-66

	Thousand Metric Tons							
	1955	1960	1961	1962	1963	1964	1965	1966
US <sup>b</sup> .....	1,762*	2,851*	3,111*	3,674*	4,088*	4,583*	5,299*	6,000*
USSR <sup>c</sup> .....	160*	312*	384*	452*	567*	699*	801*	971*

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Because of differences in definition and product mix, Soviet and US data on plastics are not strictly comparable. For the overall category of plastics, however, there is enough similarity to permit broad comparisons.

<sup>b</sup> Dry basis, excluding water, solvents, and other liquid diluents.

<sup>c</sup> Data differ from those presented in the previous *Handbook*, in which data included asphalt-pitch and bitumen plastics.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data are for coal, crude oil, natural gas, and hydroelectric power expressed in terms of coal equivalents (calorific value of 7,000 kilocalories per kilogram), and exclude minor fuels such as peat, shale, and fuelwood.

<sup>b</sup> The following coefficients were used to convert the sources of primary energy into hard coal equivalents: coal (metric tons), 1.0; brown coal and lignite (metric tons), 0.29; crude oil (metric tons), 1.3; crude natural gasoline (metric tons), 1.5; natural gas (1,000 cubic meters), 1.33; and hydroelectricity (1,000 kilowatt-hours), 0.55. Production of geothermal and nuclear electric power is included at the same ratio as hydroelectricity.

<sup>c</sup> Including data for Luxembourg.

Japan.....	145*	676*	1,821*								

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data include only nonassociated gas from natural gas wells and associated gas from petroleum fields.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries." Data are for net production—that is, for gas actually collected and utilized as fuel or raw material. They thus exclude gas used for repressuring, as well as gas flared, vented, or otherwise wasted, whether or not it has first been processed for the extraction of natural gasoline.

<sup>c</sup> Data for the US are in terms of net marketed production and agree with the general definition for the NATO data. Data for the USSR are believed to refer to gross production less losses and waste. US gross production (less losses and waste), which would include gas returned to reservoirs in order to maintain horizon pressure (about 9 percent of gross production in 1965) would be as follows (billion cubic meters):

1955	1960	1961	1962	1963	1964	1965
310	411	423	442	470	484	500

A much smaller share of total production in the USSR is believed to be used for repressuring.

<sup>d</sup> Gross production.

<sup>e</sup> Including methane (dry) gas and wet gas from oilfields.

<sup>f</sup> Including gas used for repressuring and wasted.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data are for total (gross) production at generating centers and therefore include transmission losses and station use. (See footnote b, below.)

<sup>b</sup> Data are gross production or estimates of gross production based on reported net, adjusted by increasing by 7.5 percent the thermal electric production to include production that is consumed by the station itself. Hydroelectric production that is consumed by the station itself is a negligible part of the total gross production. Therefore, no attempt has been made to adjust the net production for hydroelectric power.

<sup>c</sup> Including data for West Berlin, for which separate data are not available.

<sup>d</sup> Data are for the year beginning 1 April of the stated year.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data are for the gross amount of marketable iron ores in the state in which they leave the mines, including manganiferous ores but excluding pyrites.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries." The metal content of the ore in the NATO countries and other Free World countries follows: Austria, Luxembourg, and the UK, 27 to 30 percent; Belgium, France, and West Germany, 31 to 34 percent; Greece, Italy, Portugal, Spain, and the US, 46 to 50 percent; Canada and Japan, 55 percent; Sweden and Turkey, 60 to 61 percent; and India, Norway, and Venezuela, 57 to 62 percent. The metal content of iron ore in Denmark is not available.

<sup>c</sup> Excluding manganiferous iron ore containing 5 percent or more of manganese.

<sup>d</sup> The metal content of the ore in selected Communist countries follows: the USSR, in terms of dressed ore, 55 percent of the ore; Communist China, 20 to 50 percent; North Korea, 40 to 50 percent; Albania, 50 to 55 percent (1 percent nickel); Bulgaria, 38 to 50 percent; Czechoslovakia, 34 percent; East Germany, 25 to 30 percent; Hungary, 24 to 28 percent; Poland, 30 percent; Rumania, 32 to 40 percent; Yugoslavia, 40 percent; and North Vietnam, 55 percent.

<sup>e</sup> Plan data.

<sup>f</sup> Based on an announced increase for 1965 of 24 percent applied to 1964 plan data.

<sup>g</sup> Iron-nickel ore that is mined for its nickel content.

<sup>h</sup> Shipments.

<sup>i</sup> Data are for concentrates only and exclude titaniferous ores.

<sup>j</sup> Excluding certain grades.

<sup>k</sup> Merchant ores and concentrates.

<sup>l</sup> Including data for West Berlin, for which separate data are not available.

<sup>m</sup> Including iron sand and pyrites.

<sup>n</sup> Including concentrates.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Because of the difficulty of determining valid rates of exchange, data are not presented in terms of a common currency. Official parity rates should be used with caution because they have been established and maintained arbitrarily and do not necessarily reflect the true ratio for construction. For example, the estimated ruble-dollar ratio for construction in the USSR in 1955 prices is about 0.70 new ruble to US \$1.

<sup>b</sup> State sector, private housing construction, and construction-installation work performed by collective farms.

<sup>c</sup> Expressed in investment prices of 1 July 1955 adjusted for new unit valuations introduced in 1956, for the reduction of overhead cost norms in 1958, and for the reduction of equipment installation prices in 1959. In addition, the series reflects adjustments for the reduction in 1962 of prices for project-survey work and of unit valuations for certain types of construction-installation work.

<sup>d</sup> Excluding private construction.

<sup>e</sup> Excluding capital repairs.

<sup>f</sup> Deutsche Mark East (East German marks).

<sup>g</sup> Socialized sector.

<sup>h</sup> Expressed in 1961 prices. A currency reform of August 1965 revalued the lek at a ratio of 10 old leks to 1 new lek.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Total housing space, which includes living rooms, bedrooms, dining area, and auxiliary space such as bathrooms, kitchens, closets, and inside hallways.

<sup>b</sup> Data are computed from the number of housing starts during the given years. Strictly speaking, therefore, the data on completions are more accurate for interyear comparisons than for any given year. Housing starts were converted to total floorspace by converting to square meters on the basis of varying sizes of structures.

<sup>c</sup> Data are for 1957.

<sup>d</sup> Living space only.

<sup>e</sup> New and reconditioned buildings.

<sup>f</sup> Urban housing only.

<sup>g</sup> Estimated average yearly construction based on announced performance for several years.

<sup>h</sup> Official North Korean data for housing construction reported as 6.13 million square meters.

<sup>i</sup> Socialist sector only.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> The total land area of the country and, unless otherwise indicated, bodies of inland water.

<sup>b</sup> Arable land includes land planted to crops (with double-cropped areas being counted only once); land temporarily fallow; temporary meadows for mowing or pasture; garden land; land under fruit trees, vines, and fruit-bearing shrubs; and rubber plantations.

<sup>c</sup> One hectare equals 2.471 acres. Data are for various years during 1957-66.

<sup>d</sup> Land area only.

<sup>e</sup> Total agricultural area.

<sup>f</sup> Land belonging to agricultural holdings exceeding 0.405 hectare (1 acre).

<sup>g</sup> Continental sector only.

<sup>h</sup> Including data for Kashmir-Jammu.

<sup>i</sup> Including data for the Balearic and Canary Islands.

<sup>j</sup> Official Soviet data (22,402,200 square kilometers) include the White Sea (90,000 square kilometers) and the Sea of Azov (40,000 square kilometers), which are excluded by definition from the data shown.

<sup>k</sup> Including only plowland and lands formerly cultivated but now idle.

1966....	56.90*	10.62*	N.A.*	N.A.*	8.76*	N.A.*	498.8*	N.A.*

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> The years refer to the crop years—that is, the year ending 30 June of the last year of the 2 years stated.

<sup>b</sup> Data are for cleaned rice, jowar, bajra, corn, ragi, small millets, wheat, and barley. Production data relate to harvests mostly completed within the stated calendar years and have been reduced by 12.5 percent to eliminate amounts used for feed, seed, and waste. Therefore, these data differ from those presented in Table 32, p. 32.

<sup>c</sup> A minus sign indicates amounts reserved for stocks; a plus sign indicates additions to net availability from stocks.

<sup>d</sup> Including data for Sikkim and Kashmir-Jammu. Midyear population is used because crop production in India occurs at a period different from that in most other Northern Hemisphere countries.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Whole milk from cows.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries."

<sup>c</sup> Including milk sucked by young animals.

<sup>d</sup> In terms of 3.5 percent butter-fat content.

<sup>e</sup> Data for 1962 and subsequent years have been revised slightly and therefore are not strictly comparable with previous years.

<sup>f</sup> Including sheep and goat milk.

<sup>g</sup> Including goat milk.

<sup>h</sup> Under Milk Marketing Schemes only.

<sup>a</sup> An asterisk indicates that the data are unclassified.<sup>a</sup> Unless otherwise indicated, data are for beet sugar produced in the calendar year. Data are given in terms of the raw value of centrifugal sugar. Refined sugar is equal to approximately 90 percent of raw sugar by weight. Centrifugal, as distinguished from noncentrifugal, sugar includes cane and beet sugar produced by the centrifugal process and is the principal type of sugar moving in international trade.<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries."<sup>c</sup> Including cane sugar.<sup>d</sup> Refined, including imported raw sugar.<sup>e</sup> Data are for the campaign year beginning in September of the year stated and ending in March of the following year.<sup>f</sup> Data are for 1957.<sup>g</sup> Cane sugar only.<sup>h</sup> Including data for Luxembourg.<sup>i</sup> Data are for the Azores and Madeira only.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Total traffic for all urban streets and rural roads. These data are partly estimated. The data differ from those presented in the previous *Handbook* because of a revision in the estimate of the relationship between intercity traffic and total traffic on urban streets and rural roads.<sup>b</sup> Including inland waterway, coastal, and intercoastal freight traffic. The US includes Great Lakes freight traffic, and the USSR includes Caspian Sea freight traffic. Data for the US differ from those in the previous *Handbook*, in which data included foreign trade within domestic waters and some double counting of coastwise traffic within domestic waters.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data exclude urban systems; plantation, forest, mine, industrial plant, underground, funicular, and cable railways; and short lines of little importance. Unless otherwise indicated, data are for the state or principal railroad system and include all goods and livestock carried during the calendar year and exclude service traffic, mail, and nonrevenue government stores. Freight traffic carried on more than one railroad line within a country is counted only once. Foreign trade freight traffic carried through more than one country, however, is counted in each country. Data for the US include express and mail and are specifically for revenue and nonrevenue freight traffic for a more realistic comparison with Soviet methods of reporting.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries."

<sup>c</sup> Including secondary or private railroads operating as common carriers.

<sup>d</sup> Including performance of railroads owned jointly by Hungary and Austria.

<sup>e</sup> Including service traffic.

<sup>f</sup> Including mail and passenger baggage. Data are for the year beginning 1 April of the stated year.

<sup>g</sup> Including military and government traffic.

<sup>h</sup> Excluding livestock.

<sup>i</sup> Excluding express parcels.

<sup>j</sup> Including data for the Ofoten railroad.

<sup>k</sup> Data are for the year beginning 1 July of the previous year.

<sup>l</sup> Excluding data for Northern Ireland.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data exclude urban systems; plantation, forest, mine, industrial plant, underground, funicular, and cable railways; and short lines of little importance. Unless otherwise indicated, data are for the state or principal railroad system and include all goods and livestock carried during the calendar year and exclude service traffic, mail, and nonrevenue government stores. Freight traffic carried on more than one railroad line within a country is counted only once. Foreign trade traffic carried through more than one country, however, is counted in each country. Data for the US are in tons originated, thus giving a more realistic comparison with European methods of reporting.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries."

<sup>c</sup> Including secondary or private railroads operating as common carriers.

<sup>d</sup> Including performance of railroads owned jointly by Hungary and Austria.

<sup>e</sup> Including service traffic.

<sup>f</sup> Data for the government railroads are for 1965, and data for the private railroads are for 1964.

<sup>g</sup> Including data for the Ofoten railroad.

<sup>h</sup> Including data for Northern Ireland.

<sup>i</sup> Data include through consignments between private and government railroads.

<sup>a</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries."

<sup>b</sup> Traffic on all US waters except on the Great Lakes—that is, including not only internal, intraport, and local traffic but also coastwise and foreign trade traffic within US waters. For 1964 it has been calculated that coastwise and foreign trade traffic within US waters together amounted to about 60 billion metric ton-kilometers. In the same year traffic on the Great Lakes amounted to 107 billion metric ton-kilometers of domestic trade and 47 billion metric ton-kilometers of US foreign trade.

<sup>c</sup> Data for North Korea are included with ocean freight traffic in Table 175, p. 171.

<sup>d</sup> Traffic began in June 1964.

<sup>e</sup> Data are for June–December 1964 and are included in NATO total for 1965.

<sup>a</sup> Data are as of the end of the year and exclude light aircraft.

<sup>b</sup> Data differ from those presented in the previous *Handbook*, which included aircraft in operations of certificated route air carriers. In order to present a more realistic comparison between the US and the USSR, US data have been revised to include all aircraft that perform commercial for-hire operations, and to exclude light aircraft and helicopters. In the US, there are more than 1,400 multi-engine aircraft of more than 2,000 horsepower, which are operated by private corporations and individuals. The USSR has no counterpart.

<sup>c</sup> The large increase in the inventory shown for helicopters from 1964 to 1965 is probably due to inadequate intelligence reporting of the helicopter inventory before 1965, rather than to any absolute increase of this magnitude.

<sup>a</sup> Ships of 1,000 gross register tons (GRT) or more. Unless otherwise indicated, data are as of the end of the year. Data for the NATO countries include all combination passenger and cargo ships, whereas those for the Communist countries exclude passenger ships that have small cargo capacities.

<sup>b</sup> Data are as of midyear.

<sup>c</sup> Excluding ships operating only on the Great Lakes.

<sup>d</sup> Excluding the Caspian Sea fleet.

<sup>e</sup> In some years, a few additional Bulgarian-owned ships were operated under the flags of Free World countries. At the end of 1966, three additional

Bulgarian-owned ships totaling 13,450 GRT were being operated under Greek and Ethiopian flags.

<sup>f</sup> In most years, an undetermined number of Czechoslovak-flag ships were jointly owned with Communist China.

<sup>g</sup> Including some ships flying the Polish flag but under the control of the Chinese-Polish Shipbrokers Corporation. At the end of 1966, there were 16 of these ships, totaling 129,900 GRT.

<sup>h</sup> Including coastal passenger ships.

<sup>i</sup> Except for 1960, data include an unknown number of ships jointly owned by the Chinese-Albanian Joint Stock Shipping Company.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Official rates unless otherwise indicated. These rates are used for converting trade statistics.

<sup>b</sup> Rates used for noncommercial transactions such as diplomatic, tourist and student expenditures, personal remittances, and the like. Some countries have special rates for tourists and personal remittances in addition to the noncommercial rate:

<sup>c</sup> The unofficial rates actually used in East German accounting of foreign trade transactions. Official rates still listed, but not used, are 2.22 DME to US \$1 and 2.47 DME to 1 ruble.

<sup>d</sup> Based on the cross rate of exchange between the yuan and UK pound sterling.

Imports, USSR, from developed countries	67	Maritime tankers, construction of	175
Imports, USSR, from Eastern Europe	63	Meat	154
Imports, USSR, from less developed countries	69	Merchant fleet, inventory of	187
India, agricultural production	147	Metalcutting machine tools	138
India, grain availability	147	Metalforming machine tools	139
India, selected economic data	32	Metallurgical coke	110
Industrial and agricultural production	6-10	Metallurgical equipment	139
Industrial and agricultural production indexes, Eastern Europe	8	Metals, ferrous and ferroalloying	116-125
Industrial and agricultural production indexes, US and USSR	6	Metals, nonferrous	126-133
Industrial production indexes	7	Middle East, Communist aid to	87-89
Industrial production indexes, by branch, USSR	10	Military, academic, and technical trainees to Communist countries	90, 91
Industrial production indexes, gross, Communist countries	9	Military aid, Communist, to less developed countries	72-99
Industrial products and raw materials	100-133	Military aircraft, production of	23
Inland water freight traffic	169, 170	Military and economic aid	72-99
Investment and finance data, USSR	11-15	Military and economic technicians, Communist, in less developed countries	96-98
Investment, gross fixed, USSR	12	Military expenditures and equipment	19-23
Iron ore	119	Military expenditures, USSR	19-23
Iron, pig	118	Military expenditures, USSR, by mission	19, 20
Italy, selected economic data	33	Military trainees to Communist countries	92
		Milk	155
		Mineral fertilizer	103, 104, 145
Labor force	26	Mineral fertilizer, nutrient content	103, 145
Labor force, agricultural	27	Minerals and metals	116-133
Labor force, nonagricultural	28	Molybdenum	123
Land utilization	146	Mongolia, selected economic data	50
Latin America, Communist aid to	87, 88	Motors, electric	140
Lead, smelter	130	Motor vehicle freight traffic	167, 168
Less developed countries, Communist aid to	72-99		
Less developed countries, Soviet trade with	68, 69	National product, gross	1-5
Lignite and brown coal	109	NATO countries, exchange rates	201
Livestock, inventory of	158, 159	NATO countries, GNP	2, 4
Locomotives, diesel, production of	178	NATO, European, selected economic data	30
Locomotives, electric, production of	179	Natural gas	113
Locomotives, inventory of	184	Natural rubber	105
Locomotives, mainline, production of	177	Naval ships, construction of, Communist countries	22
Locomotives, production of	177	Nickel, refined	121
Long-distance telephone calls	190	Nonagricultural labor force	28
		Nonferrous ores and metals	126-133

	Page		Page
North Korea, selected economic data	46	Receivers, television, production of	194
North Vietnam, selected economic data	47	Refined copper	127
Ocean freight traffic	171	Refined nickel	121
Oil, crude	111	Refined zinc	131
Ore, iron	119	Refrigerators	17
Ore, manganese	120	Repayments, scheduled, on Western credits to USSR	13
Ore, tungsten	125	Rice	153
Ores and metals, ferrous and ferroalloying	116-125	Rolled steel	117
Ores and metals, nonferrous	126-133	Rubber and rubber products	105, 106
Passenger automobiles in use	17	Rubber, natural	105
Passenger automobiles, production of	181	Rubber, synthetic	105
Passenger traffic, air	172	Rubber tires	106
Payments deficit, USSR	14	Rumania, selected economic data	44
Performance, communications	189-191	Ships, fishing, construction of	176
Performance, transportation	163-173	Ships, maritime cargo, construction of	174
Persons supplied per farm worker	17	Ships, naval, construction of, Communist countries	22
Petroleum exports, USSR	70	Shoes	137
Petroleum pipeline transportation	173	Smelter lead	130
Petroleum products	112	Soda, caustic	102
Pig iron	118	Space expenditures, US and USSR, by mission	19
Pipeline transportation, petroleum	173	Space expenditures, USSR	19, 20
Plan, economic, USSR, for 1970	18	Space systems expenditures, USSR	20
Plastics	104	Sponge, titanium	133
Poland, selected economic data	43	State budget, USSR	11
Population	25	Steel, crude	116
Population and country tables	24-51	Steel, rolled	117
Potatoes	153	Students from less developed countries in Communist countries	93, 94
Power, electric	114	Sugar	156
Power equipment	141	Sulfuric acid	100
Power, hydroelectric	114	Synthetic ammonia	101
Primary aluminum	128	Synthetic fibers	137
Primary energy	107	Synthetic rubber	105
Primary magnesium	133	Tanker fleet, inventory of	188
Primary tin metal	132	Tankers, maritime, construction of	175
Processed foods and fish catch	154-157	Technical, academic, and military trainees to Communist countries	90, 91
Producers' goods	138-141	Technicians, Communist, economic and military, in less developed countries	96-98
Radio receivers in use	195	Telegrams, domestic	191
Radio receivers, production of	193	Telephone calls, long-distance	190
Railroad freight cars, inventory of	185	Telephones in use	189
Railroad freight cars, production of	180	Television receivers in use	196
Railroad freight traffic	165, 166	Television receivers, production of	194
Rates of exchange, Communist countries	199	Tin metal, primary	132
Rates of exchange, NATO countries	201	Tires, rubber	106
Raw materials and industrial products	100-133	Titanium sponge	133
Rayon and acetate fabrics	136		
Rayon and acetate yarn	136		
Receivers, radio, in use	195		
Receivers, radio, production of	193		
Receivers, television, in use	196
